

COVALENCE PRODUCT LINE

Covalence combines **powerful
cyber protection with simplicity.**

covalence.fieldeffect.com

As a turnkey managed security service, Covalence provides comprehensive threat detection and response across your clients' endpoints, networks, and cloud services – all delivered and managed through a single portal.

The unique strength of Covalence is that it not only sees into every aspect of a business' threat surface, but it aggregates the data from multiple security events into simple, actionable steps.

- No security expertise required
- No more alert fatigue
- Easy to deploy and manage
- Priced for any size organization

COVALENCE CLOUD

Protect the cloud services businesses rely on to scale their business.

COVALENCE COMPLETE

Safeguard the entire threat surface with complete protection across networks, endpoints, cloud services, and applications.

Covalence is available in flexible packages, so you can choose the one that fits your clients' infrastructure and security needs while still delivering the highest level of protection.

Feature Descriptions

24X7 SECURITY MONITORING

Get comprehensive, 24x7 monitoring, alerting, and analysis of potential threats and vulnerabilities across endpoints, networks, and cloud services. Covalence Cloud and Covalence Complete include monitoring of Microsoft 365, Google Workspace, Dropbox, Box.com, AWS, Azure, Okta.

ACTIVE RESPONSE

Sleep better at night with automated remediation of active threats and compromises on your network that our team isolates and prevents from spreading.

APIS & SDKS

Easily integrate with existing business applications and security tools, including ConnectWise, VMware Carbon Black, VMware AirWatch, and Microsoft Intune, to further streamline alerts and threat management.

ACTIONABLE ALERTS (AROS)

Receive immediate alerts for threats, vulnerabilities, and other security-related risks – all triaged by Covalence to remove noise and show only the alerts that matter. These alerts are delivered as Actions, Recommendations and Observations (AROs), which are prioritized, actionable alerts that provide all the information needed to understand and resolve threats.

APPLIANCE UPDATES & NEW SERVICES

Get access to all feature updates and new services at no extra charge.

CYBER CONCIERGE

Access a dedicated team of experienced cyber analysts for help with anything from technical support to advice on security strategy.

DNS FIREWALL

Fortify the network perimeter with a DNS firewall that ensures safe web browsing and Internet access by blocking connections to malicious websites.

DOMAIN MONITORING

Protect against phishing and other potential attacks by monitoring and receiving alerts about activity by unknown users trying to create and register similar domains.

FLEXIBLE REPORTING

Receive weekly and monthly reports that summarize issues found and the actions taken to resolve them. You or your clients can also self-generate reports based on historical data from any 30-day period.

OPERATIONS PORTAL

Set up the Covalence service within minutes and check your clients' security status, action AROs, and request help any time through the Field Effect portal.

SECURITY OBSERVER

Take a closer look at how Covalence analyzes data from the Observer View, which is an informational tool that lets you explore underlying indexed data to learn more about the network, endpoint, and cloud layers.

SUSPICIOUS EMAIL ANALYSIS SERVICE (SEAS)

Upload suspicious emails for immediate analysis of an email's content, metadata, and attachments. We notify you within minutes if we see anything of concern.

THREAT HUNTING

Gain actionable insights and security recommendations thanks to expert threat hunters who dive deep into network and Covalence data to identify new, emerging, or otherwise undetected vulnerabilities and threats.

Prevention is your best defence.
Start securing your business today.
