

Field Effect MDR Cloud Coverage

Deploy flexible, comprehensive protection
across cloud-based email and applications.

Field Effect MDR protects your expanding cloud environment against the latest vulnerabilities and threats with flexible, real-time threat detection and 24/7 monitoring and response.

With complete visibility and user-level insight, you can stop unauthorized access and compromise from within your cloud-based email and application accounts and pinpoint vulnerabilities from across your network, improving your security posture as you continue to grow.

DETECT POTENTIAL COMPROMISE

Detect and triage security events in the cloud automatically and receive prioritized alerts with simple instructions for remediation.

UNDERSTAND ROOT CAUSE

Correlate events from across your environment to streamline investigation and determine root cause.

ISOLATE COMPROMISED ACCOUNTS

Rapidly isolate compromised cloud accounts, stopping threat actors and active attacks.

**Protect the tools
that matter most.**

 Microsoft 365  Google Workspace

   servicenow

Key benefits:

- ✓ Stop attacks in real time
- ✓ Reduce your total cloud attack surface
- ✓ Correlate events to understand attacks
- ✓ Get total peace of mind with 24/7 monitoring & threat hunting

Gain superior visibility

Forensic-level user insight gives you complete visibility into the threats facing your cloud environment.

- Full inventory of active and dormant cloud accounts with login attempts.
- Prioritized list of most-targeted accounts.
- Full visibility of attempted attacks with corresponding security events identified from across your environment.

Stop bad behavior

Track what's normal—and stop what's not—to prevent threat actors from accessing your sensitive data. Field Effect MDR detects and correlates irregular event activity to identify incidents and attacks early, including:

- **Potential credential compromise:** Failed logins, concurrent users, or access from unexpected locations, devices, and dormant accounts.
- **Data exfiltration:** Abnormal patterns of data sharing, downloading, and deletion.
- **Suspicious inbox rule creation:** Creation of rules that may hide phishing campaigns.
- **Changes to access controls:** Identify modified access to data and storage.
- **Malware:** Detect latent malware hiding within document storage or in phishing emails.
- **And more.**

Boost cybersecurity resiliency

Empower your team with the tools needed to stay ahead of the latest attacker techniques with detailed monitoring and sophisticated analysis.

DOMAIN MONITORING:

Receive alerts when domains similar to yours are created, flagging potential typosquatting attacks.

SUSPICIOUS EMAIL ANALYSIS SERVICE (SEAS):

Allows business users to submit phishing emails on-demand and correlate threats across your network, removing burden from admin teams.

EXPERT-LED SUPPORT:

Receive help for anything from technical support to advice on cloud security.

Complete protection in one simple solution

Field Effect secures your cloud, network, and endpoint layers to protect your business from the widest range of cyber threats and vulnerabilities.

You also get continued support and guidance from the industry's top cybersecurity experts.

Profound simplicity, powerful cybersecurity.

Field Effect MDR is an advanced cybersecurity solution that monitors and protects your entire threat surface—endpoints, networks, and cloud services—all from a single platform. No add-ons, no modules, and no gaps in your security. Field Effect MDR not only monitors every aspect of a business's threat surface, but reduces alert fatigue and false positives by aggregating data from multiple security events into simple, actionable remediation steps.

FIELD EFFECT / MDR

About Field Effect

Field Effect believes that businesses of all sizes deserve powerful cybersecurity solutions to protect them.

Our threat monitoring, detection, and response platform, along with our training and compliance products and services are the result of years of research and development by the brightest talents in the cybersecurity industry. Our solutions are purpose-built for SMBs and deliver sophisticated, easy-to-use and manage technology with actionable insights to keep you safe from cyber threats.
