

Covalence Cloud Coverage

Deploy flexible, comprehensive protection across cloud-based email and applications.

Covalence protects your expanding cloud environment against the latest vulnerabilities and threats with flexible, real-time threat detection and 24/7 monitoring and response.

With complete visibility and user-level insight, Covalence identifies abnormal activity and stops unauthorized access and compromise from within your cloud-based email and application accounts. Pinpoint vulnerabilities from across your network to improve your security posture as you continue to grow.

DETECT POTENTIAL COMPROMISE

Detect and triage security events in the cloud automatically and receive prioritized alerts with simple remediation instructions.

MAXIMIZE ALERT FIDELITY

Correlate events from across your environment to streamline investigation and determine root cause.

ISOLATE COMPROMISED ACCOUNTS

Rapidly isolate compromised cloud accounts, stopping threat actors and active attacks.

Protect the tools that matter most.

 Microsoft 365  Google Workspace

 aws  box  servicenow

 salesforce  dupe  zendesk  okta

Key benefits:

- ✓ Block threats and suspicious activity
- ✓ Reduce your total cloud attack surface
- ✓ Correlate events across the threat surface to maximize protections
- ✓ Get peace of mind with 24/7 monitoring & threat hunting

Gain superior visibility

Forensic-level user insight gives you complete visibility into the threats facing your cloud environment.

- Full inventory of active and dormant cloud accounts with login attempts.
- Prioritized list of most-targeted accounts.
- Full visibility of attempted attacks with corresponding security events identified from across your environment.

Stop abnormal behavior

Track what's normal—and stop what's not—to prevent threat actors from accessing your sensitive data. Covalence detects and correlates irregular event activity to identify incidents and attacks early, including:

- **Potential credential compromise:** Failed logins, concurrent users, or access from unexpected locations, devices, and dormant accounts.
- **Data exfiltration:** Abnormal patterns of data sharing, downloading, and deletion.
- **Suspicious inbox rule creation:** Creation of rules that may hide phishing campaigns.
- **Changes to access controls:** Identify modified access to data and storage.
- **Malware:** Detect latent malware hiding within document storage or in phishing emails.
- **And much more.**

Boost cybersecurity resiliency

Empower your team with the tools needed to stay ahead of the latest attacker techniques with detailed monitoring and sophisticated analysis.

DOMAIN MONITORING:

Receive alerts when domains similar to yours are created, flagging potential typosquatting attacks.

SUSPICIOUS EMAIL ANALYSIS SERVICE (SEAS):

Allows business users to submit phishing emails on-demand and correlate threats across your network, removing burden from admin teams.

EXPERT-LED SUPPORT:

Receive help for anything from technical support to advice on cloud security.

Complete protection in one simple solution

Covalence secures your cloud, network, and endpoint layers to protect your business from the widest range of cyber threats and vulnerabilities.

You also get continued support and guidance from the industry's top cybersecurity experts.

The most sophisticated cyber threat monitoring on the planet, **made simple.**

Covalence is an award-winning cybersecurity solution that provides transparent, holistic managed detection and response for your whole IT infrastructure in one platform, no matter where you are or where your endpoints are located. No add-ons, no modules, and no gaps in your security. Learn more about Covalence.
