

# Incident Response Readiness

## Being prepared for an incident is a key aspect of your defense

Alongside a strong defense, preparing for a breach is a critical element in your overall cybersecurity strategy and also a requirement for most regulatory frameworks. A finely tuned incident response plan not only helps you achieve compliance but will minimize the impact to your business, should an incident occur.

With Field Effect's Incident Response Readiness service, you can improve your resilience and ensure your team is ready to respond in any scenario. We work with you to strengthen your readiness and make certain the right personnel and procedures are in place for an incident. So you can identify, respond and recover from attacks faster, minimizing downtime. Utilizing proven methodologies that combine industry best-practices and decades of Incident Response experience, Field Effect helps you:

### STRENGTHEN YOUR DEFENSE

Proactively identify gaps in your overall security posture and minimize vulnerabilities to reduce the likelihood of a cyber incident.

### BUILD RESILIENCY

Your incident response team is your last layer of defense against attackers. Empower them to act confidently and effectively with a detailed incident response plan.

### MINIMIZE DOWNTIME AND IMPACT

Respond to attacks faster so you can minimize the impact on operational downtime and your reputation.

### MEET REQUIREMENTS

Receive a detailed incident response plan to help comply with leading industry frameworks and qualify for cyber insurance your reputation.

## Expert-led guidance and personalized deployment

Your organization is unique and your IR plan should be too. Your dedicated strategic cybersecurity advisor will evaluate your organization to tailor a detailed response plan according to your specific environment and technical maturity.

## Key benefits:

- ✓ An effective response plan, designed for your organization
- ✓ Strengthen your ability to recover from attacks
- ✓ Expert-led guidance and implementation
- ✓ Help achieve compliance with industry-recognized standards
- ✓ Meet cyber insurance requirements

---

## Identify and eliminate your gaps

We work with you to evaluate your current readiness to respond and recover from an attack across our proprietary security controls. Our team will identify gaps and provide prioritized and actionable remediation. We will assess:

### THREAT SURFACE

What aspects of your environment could be vulnerable to cyber threats?

### HIGH-VALUE ASSETS

What resources are critical for business functions?

### SECURITY SOLUTIONS

What security solutions exist to help protect your environment?

### BACKUP MANAGEMENT

What are your existing backup management processes?

### LOG MANAGEMENT

What are your existing log management practices?

### RESTORATION

What are your existing system restoration and deployment practices?

### INCIDENT RESPONSE READINESS

What is the organization's current incident response capacity?

## Why Field Effect?

Proven methodologies

World-class experts that specialize in IR and IR Readiness

Client-first, tailored approach

## Develop your trusted incident response plan

Receive a tailored incident response plan, including a detailed communication plan, and playbooks for six types of major cyber security compromises, including prioritized response actions to detect, contain, respond and recover from a cyber incident.

## Test your plan

Want to take the next step in your incident readiness? Test your incident response plan with an interactive incident simulation and identify gaps in your readiness.

Learn how to add a tabletop exercise to your IR Readiness by talking to your account executive.

## About Field Effect

Field Effect believes that businesses of all sizes deserve powerful cybersecurity solutions to protect them.

Our threat monitoring, detection, and response platform, along with our training and compliance products and services are the result of years of research and development by the brightest talents in the cybersecurity industry. Our solutions are purpose-built for SMBs and deliver sophisticated, easy-to-use and manage technology with actionable insights to keep you safe from cyber threats.
